(a)
peak temperature (°C)
layer
layer-top probe (x = 120 mm)
field maximum (steady segments)
(b)
melt pool, liquidus isotherm (mm)
layer
depth below layer top
length
layer height 3 mm
(c)
temperature when the next layer starts (°C)
layer
layer top (mid-length)
substrate bottom
(d)
cooling rate (°C s⁻¹)
layer
635→571 °C (solidification)
500→300 °C
